

Good morning – I am here for Diane, who owns her own accounting firm, Diane Fulmer, CPA. Diane offers tax and consulting services to individuals, small business and not-for-profit organizations. Diane works hard to take advantage of every tax deduction available to her clients. Her goal is to make tax time less painful for everyone involved and to explain your tax return and your options in a clear and precise manner. She especially likes to assist the first-time home buyer who may be itemizing deductions for the first time and to help them take advantage of all deductions possible. She works to build a long-term relationship with her clients so that they always feel comfortable to just pick up the phone and ask her a question. She has had a relationship with most of her clients for over 20 years and they in turn continue to refer new clients to her. She has built her practice entirely on referrals. She likes to get to know her clients and to be available for them when they need her. She is always just a phone call or an email away. It doesn't take days for her to return a call or to answer a question and she works hard to get your return to you as quickly as possible so you are not waiting weeks or even months to find out if you owe Uncle Sam or if you can start planning that vacation. For an accountant you can count on call Diane.
